Mill Neck Audiology to Present Free Hearing Aid Workshop

Are your hearing aids spending more time in a drawer than in your ears lately? If this is because you're not finding them very useful otherwise, let the experts at Mill Neck Audiology help! Attend a free workshop presented by a certified Mill Neck audiologist and discover how to get the maximum benefit from your hearing device. All hearing aid users are welcome, whether or not your devices were dispensed at Mill Neck Audiology. The workshop will be offered on Friday, May 16, from 10 am – 12 pm at the Mildred and Frank Feinberg Community Center for Hearing Health at Mill Neck Audiology, located at 40 Frost Mill Road in Mill Neck.

Mill Neck Audiology is committed to promoting hearing health. In addition to visits to schools and other venues to present information, hearing screenings are offered throughout local communities. The facility also conducts free hearing screenings every Friday by appointment. The month of May is "Better Hearing Month," so take this opportunity to attend Mill Neck's free workshop and find out what you may have been missing.

For more information and to RSVP for the May 16 workshop, please call Mill Neck Audiology at 516-628-4258.

Part of the Mill Neck Family of Organizations, the Mildred and Frank Feinberg Community Center for Hearing Health at Mill Neck Audiology features separate, state-of-the-art adult and pediatric testing areas, an assistive listening display and an observation room with a parent viewing area. The Center also dispenses hearing aids, distributes assistive listening devices and provides amplification adjustments. Cochlear implant MAPPING services are also available through a partnership with New York Eye & Ear Infirmary's Ear Institute.
